STATISTICAL TABLES

OF

THE ROYAL INFIRMARY
OF EDINBURGH:

SIXTH SERIES,

FROM 1st OCTOBER 1845 TO 30th SEPTEMBER 1846;

BEING AN

APPENDIX TO THE REPORT OF THE MANAGERS
FOR THE YEAR 1846.

COMPILED BY

JOHN HUGHES BENNETT, M.D.,
PATHOLOGIST AND KEEPER OF STATISTICS TO THE ROYAL INFIRMARY.

EDINBURGH :

PRINTED BY ROBERT HARDIE & CO.
20. FREDERICK STREET.

1847.

T A B L E I.

GENERAL STATEMENT of CASES treated in the ROYAL INFIRMARY between the 1st of October 1845 and the 1st of October 1846.

Cases remaining on the 1st of October 1845,	257
... Admitted between the 1st of October 1845 and 1st of October 1846,	3638
Of these were dismissed — Cured,	2270
... . . Relieved,	538
Not Relieved, Irregular, or from other causes,	410
Died,	407
Total Dismissals,	3625
Remaining under treatment 1st October 1846,	270
Total under treatment during the year,	3895

TABLE II.

PATIENTS treated in the ROYAL INFIRMARY between the 1st of October 1845 and the 1st of October 1846; arranged according to their DISEASES.

Total Respiratory Organs	543	327	139	78	35	75	216	85	50	28	53	...	23·89	25·24		

* This person was admitted during an Epileptic fit; having been subject to them for several years. About five months previously she had an attack of Delirium Tremens; and on the day following admission, a second attack set in, from which she died.

tion, a second attack set in, from which she died.

† This person had laboured under the Dolores for upwards of six years. On admission, his sufferings were most acute: on the next day he suddenly died. An opportunity was not afforded of investigating the cause of death.

† Of 67 cases of Pneumonia, 19 were complicated with or followed by Pleuritis, 3 with Pericarditis, and 1 with Endocarditis.

TABLE II.—PATIENTS treated in the ROYAL INFIRMARY between the 1st of October 1845 and the 1st of October 1846; arranged according to their DISEASES,—*continued.*

Note.—In the table of External Injuries, only those cases are included, which from their severity required residence in the Hospital.

TABLE III.

GENERAL ABSTRACT EXHIBITING THE NUMBERS ADMITTED LABOURING UNDER EACH CLASS OF DISEASES; WITH THE RESULTS, AND MORTALITY PER CENT.

T A B L E IV.

ADMISSIONS of FEVER PATIENTS in each Month during the Year ending 30th September 1846; with the Sex, and Mortality per Cent. during each Month.

Date.	Total.	Males.	Females	Died.		Mortality per Cent.	
				Males.	Fem.	Males.	Females.
1845. October . . .	88	56	32	8	3	14·25	9·37
" November . . .	79	42	37	6	5	14·28	13·51
" December . . .	69	49	20	8	2	16·53	10·
1846. January . . .	64	30	34	6	8	20·	23·52
" February . . .	35	16	19	6	2	37·5	10·52
" March . . .	47	18	29	2	2	11·11	6·75
" April . . .	29	16	13	2	1	12·5	7·46
" May . . .	33	17	16	3	4	17·64	25·
" June . . .	29	18	11	2	1	11·11	9·09
" July . . .	26	15	11	3	1	20·	9·09
" August*	49	29	20	3	3	10·34	15·
" September† . . .	28	15	13	4	2	26·66	15·37
Total . . .	576	321	255	53	34	16·51	13·33

* The cases of Febricula are excluded from this Table.

+ The numbers represented under these months include those only who were discharged up to October. The others are embraced in the number then remaining in the house.

T A B L E V.

DEATHS occurring in FEVER, classified according to Age, in Septennial Periods.

Age.	Males.	Females.
7 to 14	1	4
14 " 21	8	7
21 " 28	12	4
28 " 35	4	3
35 " 42	8	8
